INSTRUCTIONS FOR TRIGGER

A trigger is an event upon occurring of which the Scheme will automatically switch the units as the case may be on behalf of the investor on the date of happening of the event.

The features of the Trigger facility based on TAP are as: Under this facility, the investor can chose a specific % target return, the value of which, if achieved in the scheme, shall be automatically switched to any of the open ended schemes of Canara Robeco Mutual Fund as selected by the investor. This switch as selected by the investor shall be only to the extent of the amount appreciated as per the target return selected by the investor. The original invested amount by the investor at the applicable NAV will remain in the scheme. The trigger is an additional facility provided to the unit holders to save time on completing the switch formalities on achieving TAP. The minimum application amount criteria applicable to the switched schemes will be applicable. In case the amount appreciated as per the target return selected by the investor is less than the minimum application amount criteria of the switched scheme(s), the investor will receive the pay out of such amount in lieu of switch to the scheme selected by the said investor.

Target Appreciation Percentage (TAP): Any percentage as defined by the investor, point-to-point appreciation of the NAV (not to be considered as a compounded annual growth rate).

Default TAP/ Scheme : Default TAP : 20% , Default Scheme for automatic switch of the gain value will be Canara Robeco Liquid – Direct Plan – Growth

Applicable NAV for Switch : NAV of the day on which TAP is achieved will be considered for purpose of switch.
